

Report of Results

Mathias Voigt

15.03.2018

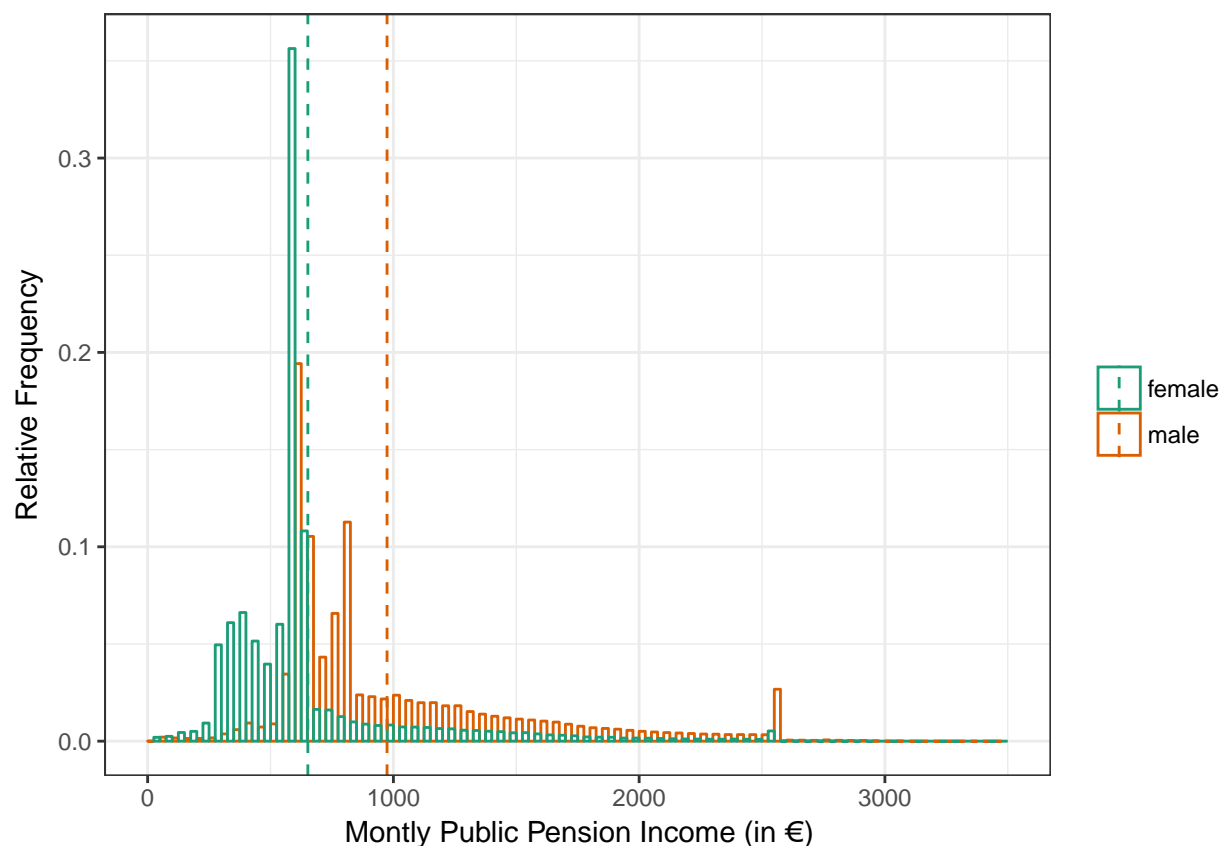

This document contains graphs, tables, code chunks, and figures that are not displayed in the paper/article version to be send to the journal. I hope it helps us to stay updated about the current state of the work and to clarify why particular results are as they are presented in the paper version. It can also help us to find out which variables and what way to code them might bring the best results.

Part 1 - Analysing survival disparities of Andalusian retirees based on individual pension income

Male/Female survival differences

The impact of disability

The distribution of income by sex

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
